Dear CFCPS Physicians,

Kaseye Mission Hospital is growing, slowly but surely, and therefore in need of qualified doctors. We are hoping to welcome a CFCPS physician in our midst. Since the hospital is off the beaten track, i.e., about six driving hours from the nearest airport, the volunteer would have to make a commitment of not less than two weeks. We wish for a doctor who likes to be involved in the daily patient care followed by regular brief sessions for our young clinical officers and nursing supervisors who yearn to deepen their knowledge and skills. Assisted by INTERPLAST Germany and the Hangartners, we are expecting to open an operating facility at the end of this year. A CFCPS volunteer physician/general surgeon could do much good, assisting us with general surgeries. Many of the common procedures our clinical officers learn in school need reinforcement to become second nature to our new OP staff.

In the name of the entire hospital staff, thank you very much for prayerfully considering this worthwhile service for the benefit of our patients.

William Kayira
Officer in Charge
